

AKQ-250/AKQ-320

AROX Ice Cube Maker

Air Cooled Type

Features

SQUARED ICE CUBE: High density squared ice cube, obtained from a single ice plate - perfect for the cooling of drinks at restaurants and events.

VERTICAL EVAPORATOR: The vertical evaporator is composed of a single grid with square copper cells. The pumps allows the water to fall from the upper part, producing a big plate of ice. The plate falls down on the store, breaking into squared ice cubes. Big ice production in short time and fast cycle, for lower water and energy consumption.

BACK STAGE: Modular machines to be fitted on separate storage in the backstage for bigger ice capacity.

Specifications

		AKQ-250	AKQ-320
Width	mm	760	
Depth	mm	620	
Height	mm	575	
Daily Production	kg/24hr	250	320
Refrigerant	-	R404a	
Power	watts	1000	1300
Net/Gross Weight	kg	70/85	71/86
Voltage	volts	110V / 1 ϕ / 60Hz 220V / 1 ϕ / 50-60Hz	

Continuing research results in steady improvements; therefore, these specifications are subject to change without prior notice.
